

UID EXPERIMENT 06 (WIREFRAME IMPLEMENTATION)

NAME : MADHUMITHA P

REG NO : 240701297

UI/UX Design Specification for Rapido-Inspired Mobile App

1. Introduction

This document outlines the design requirements and UI structure for a mobile application inspired by a bike taxi service platform. The focus is on creating intuitive, user-friendly, and visually appealing interfaces for three key screens: Login Page, Home Page, and Profile Page. The design will be created using Figma and should follow modern UI/UX best practices.

2. Objective

The objective of this project is to design a seamless user experience that allows users to:

- Easily log in or sign up
 - Book rides efficiently
 - Manage their profile and preferences
-

3. Target Platform

- Mobile Application (Android preferred)
 - Designed using Figma
 - High-fidelity UI screens with reusable components
-

4. Design Guidelines

4.1 Color Palette

- Primary Color: Yellow (#FFD400)
- Secondary Colors: Black, White
- Neutral Shades: Grey tones for backgrounds and text

4.2 Typography

- Use modern sans-serif fonts
- Maintain clear hierarchy (Headings, Subheadings, Body Text)

4.3 UI Elements

- Rounded corners for buttons and cards
- Soft shadows for depth

- Consistent iconography
- Adequate spacing and padding

4.4 UX Principles

- Simple navigation
 - Clear call-to-action buttons
 - Accessibility-friendly design
 - Consistent layout across screens
-

5. Screen Designs

5.1 Login Page

Purpose:

To allow users to securely log into the application.

Features:

- Phone number input field
- OTP (One-Time Password) login system
- Optional social login (Google, Apple)
- “Continue” or “Get Started” button

Design Elements:

- Minimal and clean layout
- Brand-focused color scheme (yellow and black)
- Travel or bike-related illustrations
- Center-aligned content for better focus

5.2 Home Page

Purpose:

To enable users to book rides quickly and efficiently.

Features:

- Map-based background interface
- Pickup and drop location input fields
- Ride options (Bike, Auto, Cab) with icons
- Price estimation display
- “Book Ride” call-to-action button

Additional Components:

- Top navigation bar with current location and profile icon
- Bottom navigation menu:
 - Home
 - My Rides
 - Safety
 - Profile

Design Elements:

- Interactive and dynamic layout
 - Clear visual hierarchy
 - Easy-to-access booking options
-

5.3 Profile Page

Purpose:

To allow users to view and manage their account details.

Features:

- User avatar, name, and phone number
- Menu options:
 - My Rides
 - Payments
 - Refer & Earn
 - Help & Support
 - Settings
- Logout button at the bottom

Design Elements:

- Card-based layout for menu items
 - Clean and organized structure
 - Easy navigation and readability
-

6. Additional Features

6.1 Micro-interactions

- Button animations
- Smooth transitions between screens

6.2 States to Include

- Loading states
 - Empty states (e.g., no ride history)
 - Error messages (invalid input, network issues)
-

7. Deliverables

- High-fidelity UI designs in Figma
 - Fully organized design system
 - Reusable components using auto layout
 - Consistent design across all screens
-

8. Conclusion

The final design should provide a smooth and engaging user experience, ensuring ease of use, visual appeal, and functional efficiency. The application must reflect modern design trends while maintaining clarity and usability.
